

HORSE CREEK GROVE

HORSE CREEK GROVE OVERVIEW

Relative Overall Vulnerability

SEVERE
10.0

This grove is ranked **SEVERE** for Relative Overall Vulnerability due to:

Wildfire Vulnerability

SEVERE - 10.0

Regen Vulnerability

MODERATE - 5.0

See the [Grove Health & Resilience](#) section below for more information.

Relative Management Priority

HIGHEST
10.0

This grove is ranked **HIGHEST** for Relative Management Priority due to:

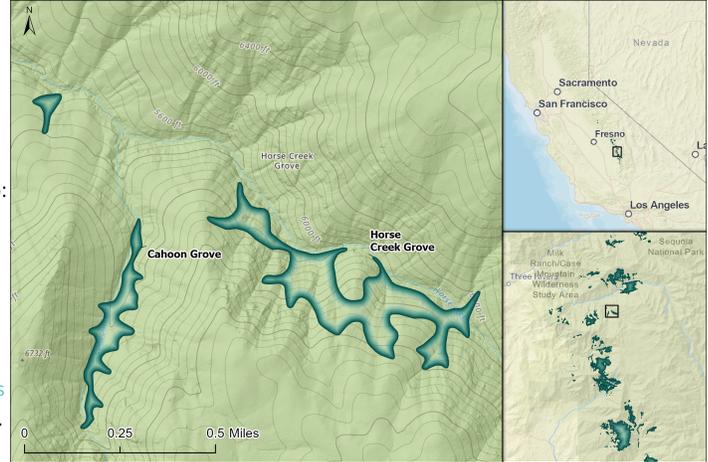

Overall Vulnerability

SEVERE - 10.0

Treatment Feasibility

GOOD - 8.3

See the [Management Considerations](#) section below for more information.

Grove Information

Grove Size (Acres)	51
Location	Kaweah River Watershed, Tulare County
Management Unit(s)	Sequoia - Kings Canyon National Park
Land Steward(s)	NPS SEKI

About Horse Creek Grove

Horse Creek Grove is a 50-acre grove in the Kaweah River Watershed region situated between 5,279 - 6,924 feet elevation at 36.41244°N. It is managed by Sequoia-Kings Canyon National Park. The grove is located along Horse Creek, tributary to the East Fork of the Kaweah River, and is very close to the Cahoon Creek grove (~1,000 ft.). It is remote and accessible only by difficult cross-country hiking.

HORSE CREEK GROVE HEALTH & RESILIENCE

SEVERE
10.0

Horse Creek Grove is ranked **Severe** for Relative Overall Vulnerability because it is at a **Severe** risk of being negatively impacted by the effects of severe wildfire and at **Moderate** risk for inadequate natural regeneration.

Relative Overall
Vulnerability

Additionally, Horse Creek Grove is at **Low** risk for negative impacts from drought stress, **Low** levels of tree mortality have been detected in the grove, and the presence and activity of beetles in the grove is **Unknown**. 0% of Horse Creek Grove has burned in large fires since 1984. See below for more detailed information.

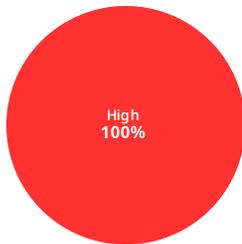

Components of Relative Overall Vulnerability

Relative Overall Vulnerability is based on **Wildfire Vulnerability** and **Regeneration Vulnerability** using an area-weighted calculation. See [Grove Assessment Analysis Methods](#) for more details.

The pie charts below provide the percentage of the grove with high, medium, and low vulnerabilities. Click on the charts to view interactive maps of these vulnerabilities within the grove.

Wildfire Vulnerability

SEVERE - 10.0

Regeneration Vulnerability

MODERATE - 5.0

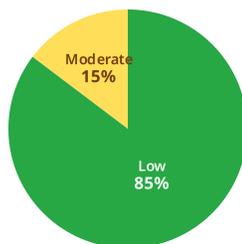

Additional Grove Health & Resilience Information

Below is additional information about Horse Creek Grove's Health & Resilience. These data, their inputs, and any available notes and updates may be found in the [Grove Resilience Datasheet](#).

Relative Drought Stress

LOW

Relative Drought Stress in Horse Creek Grove is Low based on an area-weighted average. Click on the chart for an interactive map.

Beetle Activity

UNKNOWN

Beetle Activity in Horse Creek Grove has not been determined. Please see the [Grove Resilience Datasheet](#) for details.

Tree Mortality

LOW

Tree Mortality in Horse Creek Grove is Low according to the most current available USFS dead canopy data.

Please see the [Grove Resilience Datasheet](#) for details.

Wildfire History

The table below provides information about large wildfires in this grove recorded since 1984. See this [map of wildfires and locations of high severity fire](#).

% of grove burned	0%
% of grove unburned	100%
Fire Return Interval Departure	High

HORSE CREEK GROVE MANAGEMENT CONSIDERATIONS

HIGHEST
10.0

Horse Creek Grove is ranked **Highest** for Relative Management Priority because it has **Severe** Relative Overall Vulnerability and **Good** feasibility for implementing management actions toward restoration goals.

**Relative Management
Priority**

Additionally, the grove is 4.0 miles from a community and is 2.8 miles from recreational infrastructure. See below for more detailed information.

Components of Relative Management Priority

Relative Management Priority is determined by combining the **Relative Overall Vulnerability** and **Treatment Feasibility** ranks. See [Grove Assessment Analysis Methods](#) for more details.

Relative Overall Vulnerability

SEVERE - 10.0

See the [Health & Resilience](#) section above for the component metrics for the Relative Overall Vulnerability rank.

Treatment Feasibility

GOOD - 8.3

Special Land Designation	John Krebs Wilderness Area
Grove Manager Opinion	Fuel Treatments are Possible
Remote	Yes

Additional Management Considerations

Below is additional information relevant to Horse Creek Grove's Management Considerations. These data, their inputs, and any available notes and updates may be found in the [Grove Resilience Datasheet](#).

Treatment History

The table below lists treatment projects in and 90 meters around this grove implemented **since 2022**. See this [map of grove treatments](#).

Treatment Type	% of Grove	Acres
Mechanical Treatments	0%	0
Prescribed Fire	0%	0
Pile Treatments	0%	0
Pile Burns	0%	0
Replanting	0%	0

Management Recommendations

The table below provides an estimate of the percentage and acreage of the grove that are recommended for evaluation for treatment based on the Vulnerability Models. See this [map of Grove Vulnerability Models](#).

Treatment Need	% of Grove	Acres
Fuels Reduction/Restoration	100%	51
Reforestation	0%	0
